(Ver el reverso para obtener información en español.)

Many homes, businesses and farms are in harm's way if the Green River experiences serious flooding.

FLOODING IN THE Green River Valley

Residents, businesses and farms below the Howard Hanson Dam in the Green River Valley should prepare now for a higher risk of flooding.

The higher risk is due to water seeping more rapidly through an earthen bank next to the dam after record high water last winter. Until the U.S. Army Corps of Engineers (Corps) can make repairs, it must limit the amount of flood water it stores behind the dam.

If heavy and prolonged rain occurs this flood season (roughly October through March), many homes and businesses in the valley that don't typically see flood water—including parts of Auburn, Kent, Renton, South Seattle and Tukwila—could be flooded.

Evacuations in some communities are possible. Key transportation routes and transit service could be disrupted, and power outages and sewer back-ups are possible even outside the immediate flood zone.

Prepare now to help keep your family and property safe when the rains come.

How to prepare for a flood

- 1. Make an emergency plan** and assemble an emergency kit.
- 2. Buy flood insurance now;** it takes 30 days for a policy to take effect. Review your current policy; a standard insurance policy will not cover flood damage. Contact your insurance agent or visit www.floodsmart.gov.
- 3. Purchase an inexpensive AM radio** or NOAA weather radio with batteries in case of power outages for urgent news day and night.
- 4. Monitor area news** media for information if severe weather is predicted.
- 5. Listen for alerts about evacuation routes** or visit www.kingcounty.gov/floodplans for the latest evacuation route information.
- 6. Monitor local road conditions** and obey closure signs.
- 7. Take medications and supplies with you,** for those with medical needs.
- 8. Be ready to relocate animals and livestock** out of harm's way.
- 9. Minimize flood damage:**
 - Store valuables and electronics higher on the ground floor, on the second story or in your attic.
 - Store chemicals above possible flood levels; recycle or dispose of them at the Wastemobile at the Auburn Supermall.
 - Ensure underground storage tanks are sealed and secure.
 - Learn how to use sandbags and locate where you can buy or get them ahead of time if needed for flood fighting.
 - Move vehicles and equipment to high ground before flood waters rise.
 - Keep storm drains free of leaves and other debris.
 - Know who to call and how to protect yourself if flooding leads to sewer overflows into homes and businesses.
